

Groundwork Studio is offering a full-time position to a highly motivated landscape architect/landscape designer. Our goal is to take planning and landscape architecture to their full potential through effective, dynamic, and fun public engagement; data collection, analysis and synthesis; and functional and joyful expression of place. We approach planning and design as a living, breathing, collaborative process, a transformative progression for our team as well as the project site and client. We have clients throughout New Mexico, Colorado, and Texas.

If you would like to be part of our team, we invite you to submit a cover letter, resume, and portfolio for consideration to Will Moses at will@groundworkstudionm.com.

The preferred candidate has minimum five years of experience in a design office setting. Licensure is preferred, but not required. The successful candidate will be expected to manage projects with a high degree of independence. Proficiency in the following programs is required:

- AutoCAD
- MS Office Suite including Word, Excel, Outlook, etc.
- Adobe Creative Suite including Photoshop, Illustrator, and InDesign

Additionally, proficiency in the following programs is preferred:

- Revit
- Sketchup
- ESRI products

Basic duties include, but are not limited to, production of construction documents, presentation graphics, attending public meetings, meeting with clients, developing project schedules and contracts, and development of planning documents. Duties may extend to construction administration depending on experience.

We will be accepting applications through October 9, 2020.
